PLUMBERS BELONG”***

Petition to Oppose HB 57: *“Installation Residential Water Treatment Equipment Exempt From License Requirements”*

We strongly disagree on the passage of this bill. There is absolutely no benefit to the consumer by having an unlicensed person working on or installing any “water treatment equipment”.

The State of Georgia has firmly established its licensing procedures to establish a *minimum competency level* for all persons working on or with potable water. This helps to safeguard the public from any unsafe and/or unsanitary conditions. Anything less would be unacceptable, so why would we take that chance?

Licensed Plumbers are on our last line of defense when it comes to protecting our drinking water, and without them where will the oversight come from? We firmly believe that the citizens from the Great State of Georgia will be at risk if this legislation is passed.

The following petition contains 845 names of PMA Members and their employees who are opposed to passage of this bill.

Ted Zurn
PMA Legislative Chair
