

**PLUMBING & MECHANICAL
ASSOCIATION OF GEORGIA** 

"Where Georgia's Best Plumbers Belong!"

- Be Heard • Be Profitable
- Be Educated • Be Networked

Every contractor who is serious about his or her business should be a member of their trade association. The Plumbing & Mechanical Association of Georgia is the professional trade association for plumbing and mechanical contractors. PMA and its national affiliate, the Plumbing-Heating-Cooling Contractors Association (PHCC) have been representing the interests of the industry in Georgia since 1892.

Why should contractors be members of PMA?

- They learn about and become a part of decisions that affect their industry.
- They support a legislative program that promotes and protects their livelihood.
- They learn from others who have the same challenges and opportunities.
- They take advantage of specialized educational programs.
- They are informed of technical developments and new products.

Plumbing & Mechanical Association of GA
